

GTEN Infinite v5 Series

LTE Modem Router

Locking Bands

Please follow the Infinite Tablet Modem/Router login steps below:

1. Connect to the Network (2.4G, or 5G SSID) with the router (Default SSID is displayed on the sticker at the bottom of the router)
2. Enter the default Wifi password (The default WIFI password (WIFI key) is displayed on the sticker at the bottom of the router)
3. Make sure you are connected to the correct network (SSID), then open a web browser, e.g., Google Chrome, Firefox, Safari, Edge, or Explorer
4. In the URL address bar (web address), type in 192.168.2.1, and press “Enter”, or “Return”, on your keyboard. ***It is not necessary to enter “http://”**
5. You should be at the login page for the router settings. The default **username** and **password** for the router settings login is (in all lower case, for both): **admin**
6. At the router’s main page, on the left, under **Advanced Settings**, click the **4G Modem Setting** link.
7. Find the line: **Band**, enter band number/s in the field that correspond to correct carrier of the service plan (see **Appendix B** for band numbers). Next, at the bottom of the page click **Apply** to save the settings. ***please contact Tech Support for your plan’s correct Band setting, or refer to Appendix B**
 - a. Proper format for entering multiple bands: e.g., 4:17 or 4:17:66
 - b. If the **Band** field is left blank, the modem/router will chose the best appropriate band available.
8. Finally, in the upper right section of the page, click the **Reboot** icon: 
 - a. The modem/router will power cycle and restart. Please wait 5-10 minutes for the device to complete reboot. Log into the router settings and confirm the band lock has been saved (Following steps 1-7).

***Plans/APNs not available in all areas and subject to change without notice. Please consult, and verify with Tech Support regarding correct APN for Internet service.**
